THEOCHEM, VOLUME 63 (1990)

(Journal of Molecular Structure, Vol. 204)

SUBJECT INDEX

Anaesthetics
Investigations of anaesthetic activity of nitrous oxide by quantum-chemical calculations, 1
Angular geometries
Model for elementary prediction of the angular geometries of van der Waals dimers, 229
Anharmonicities
Mechanical and electrical anharmonicities in hydrogen cyanide hydrogen-bonded clusters, 153
Aromatic nucleophilic substitution
Investigation of heteroaromatic nucleophilic substitution reaction, 45
Austin Model 1
Study of interconversion of isomers of 14-annulene by AM1 method, 201
Vinylcyclopropane rearrangement: an AM1 study, 193

Cage dimer,
Ab initio studies of structural features not easily amenable to experiment. Part 67. The 4-21G optimized structure of a novel cage dimer, $C_{22}H_{24}$ and comparison with its crystal structure, 209
Carbamate bond
Ab initio investigations of hydrolysis of carbamate bond, 331
Catalytic properties
Study of electronic structure and catalytic properties of the Keggin unit $(PMo_{12}O_{40})^{3-}$, 33
CH_2O–NH_3 system
The structure of the CH_2O–NH_3 system. Part I. Study of configurations, 101
Conformational analysis
Ab initio study of conformation and intramolecular proton transfer in enol form of acetylacetone, 137
Conformational analysis of an $O(AB)_4$ model for moieties with S_4 ($\bar{4}$) symmetry, 111
Conformation of cyclodipeptides. Factor analysis: a convenient tool for simplifying conformational studies of condensed polyring systems: prolyl-type cyclopeptides, 301
Cysteine
Ab initio studies of structural features not easily amenable to experiment. Part 69. Conformational analysis and structural study of cysteine, 361

Dibenzo-*p*-dioxin
Theoretical potential for puckering of dibenzo-*p*-dioxin, 41
Disulphide bond
Ab initio study of disulphide bond. Part 2. The change in atomic distance between S atoms on reduction of disulphide to dithiol, 247

Electronic structures,
Ab initio study of the electronic structures of carbonyl oxides, 285
Energy hypersurfaces
Energy hypersurface for HCN dimer: problems in choosing the configuration space **R**, 171

Factor analysis
Conformation of cyclodipeptides. Factor analysis: a convenient tool for simplifying conformational studies of condensed polyring systems: prolyl-type cyclopeptides, 301

Geometrical trends
Gradient ab initio study of geometrical

trends of 1,2-dioxocyclopentane and other cyclic peroxides, 219

Half-cage compounds
Ab initio charge distributions in half-cage compounds, 182
Hydrazyl radicals
Ab initio and INDO SCF MO study of monosubstituted hydrazyl radicals, 21

Inverted phosphorus atoms
1,3-diphosphabicyclo[1.1.1]pentane dication: theoretical evidence for an inverted phosphorus atom, 131

Keggin unit
Study of electronic structure and catalytic properties of the Keggin unit $(PMo_{12}O_{40})^{3-}$, 33

Lipid peroxidation
Theoretical investigation of lipid peroxidation mechanism, 379

Nitrenium ions
Alkyl and acyl substituent effects on nitrenium ion stabilities: ab initio molecular orbital calculations, 121
Non-empirical cluster model
Non-empirical cluster model study of relaxation of (111) surfaces of C,Si,Ge, 325

One-body potential
Theory of phase factors for a one-body potential of arbitrary symmetry, 373

Paramagnetic probes
Paramagnetic probe for molecular interactions. Part 4. UHF open-shell SCF study of interaction of lithium cation with dimethylnitroxide radical, 15
Phase factors
Theory of phase factors for a one-body potential of arbitrary symmetry, 373
Proton transfer
Ab initio study of conformation and intramolecular proton transfer in the enol form of acetylacetone, 137
Puckering
Theoretical potential for puckering of dibenzo-*p*-dioxin, 41

Quantum-chemical calculations
Investigations of anaesthetic activity of nitrous oxide by quantum-chemical calculations, 1

Rotational barriers
Theoretical study of conformations and rotational barriers in dihydroxybenzenes, 337
Rotational barriers adjacent to the C=N double bond in methyl and ethylimines, 67
Rotational potential energy
Rotational potential energy functions in ethylchlorosilane, (chloromethyl)methylsilane, and (chloromethyl)chlorosilane: MM2, MNDO and ab initio calculations, 79

SCF MO studies
Ab initio and INDO SCF MO study of monosubstituted hydrazyl radicals, 21
$S_2H_3^+$
Topomerization, tautomerization and deprotonation of $S_2H_3^+$, 389
Solvation effects
Appraisal of solvation effects on chemical functional groups: the amidic and the esteric linkages, 253
Substituent effects
Alkyl and acyl substituent effects on nitrenium ion stabilities: ab initio molecular orbital calculations, 121
Investigation of heteroaromatic nucleophilic substitution reaction, 45
Substituent field effects
Influence of water on substituent field effects, 353
Vibrational studies
Electronic and vibrational properties of $ONNO_2$ and ONNSO, 145
Molecular structure and vibrational treatment of dimethyl sulphide and ethyl methyl sulphide in complexes with HCl: a theoretical study, 57
Water
The influence of water on substituent field effects, 353
